Internship

AI & Cloud Intern – IBM Edunet Foundation (in collaboration with AICTE)-[Certificate](#)

August 2025

- Improved the ML model's accuracy from 72% to 81% by cleaning and improving the **data preprocessing steps**, and selecting the most useful features from 3,000+ records — worked on this in IBM Watson Studio.
- Deployed the trained machine learning model on **IBM Cloud** as a **REST API** and integrated it with the backend to serve 500+ prediction requests.

Projects

AgriPrice AI – Commodity Price Prediction System | [Github](#)

Feb 2026

Tech Stack: Python, Pandas, NumPy, Scikit-learn, XGBoost, ARIMA, SARIMA, Streamlit

- Engineered an end-to-end **time-series forecasting** pipeline for agricultural commodity prices (onion, potato, tomato), addressing real-world price volatility faced by consumers and farmers.
- Trained and compared ARIMA, SARIMA, and **XGBoost** models on engineered lag and rolling-average features to forecast prices 7 to 30 days in advance, capturing seasonal demand patterns.
- Developed an interactive Streamlit dashboard displaying forecasts with confidence intervals and automated alerts whenever predicted prices crossed defined risk thresholds.

Customer Segmentation & Personalization Engine| [Github](#)

Nov 2025

Tech Stack: Python, Pandas, NumPy, Scikit-learn, FastAPI, PostgreSQL, Docker

- Developed a customer segmentation model using RFM analysis and **K-Means clustering** to group customers into behavioral segments based on purchase history, validated with a Silhouette Score of 0.42.
- Built a recommendation system using collaborative filtering (SVD) to generate personalized product suggestions for each customer segment, achieving a Precision@5 of 0.61.
- Exposed** the segmentation and recommendation models as **REST APIs** using FastAPI, PostgreSQL, and Docker for real-time serving.

AI-Powered Resume Screening & Interview Assistant | [Github](#)

Mar 2025

Tech Stack: React, Next.js, Node.js, PostgreSQL, Python, OpenAI API

- Designed an AI-powered resume screening system using the OpenAI API to match resumes with job descriptions, achieving **75% relevance accuracy** across 30+ test cases.
- Set up secure, role-based access using **JWT** and PostgreSQL, so only authorized users could access specific data — handled directly at the database level for better **security**.
- Added a feature that auto-generates **interview questions** for each shortlisted candidate by comparing their resume with the job description, focusing on their specific skill gaps.

Certificates

- Oracle Java SE 21 – Certification Preparation (1Z0-830) | [Udemy](#)
- Data Science & AI Masters (Python, ML, GenAI) | [Udemy](#)
- Cloud Computing | [Nptel](#)

Jan 2026

June 2025

Apr 2025

Technical Skills

Languages:	Python, Java, SQL
Machine Learning:	Scikit-learn, XGBoost, Feature Engineering, Model Evaluation Metrics
Data Analysis & Visualization:	Pandas, NumPy, Matplotlib, Seaborn
Backend & Databases:	FastAPI, REST APIs, PostgreSQL
Developer Tools:	Git, Docker, Jupyter Notebook, Power BI
Core Concepts:	OOP, Statistics, Data Structures & Algorithms

Education

Lovely Professional University Punjab

Computer Science and Engineering — CGPA: 8.00

August 2023 – Present

Phagwara, Punjab

Bhagwati Senior Secondary School

Intermediate; Percentage: 96.40

April 2021 – March 2022

Dausa, Rajasthan

Adarsh Vidhya Mandir School

Matriculation; Percentage: 92.67

June 2019- March 2020

Bhusawer, Rajasthan
